Do you have any allergies to medicines and/or other substances (e.g. foods)? If yes, please state the allergy and the reaction you experienced, e.g. rash, swelling.

Have you received or are you receiving routine immunisations/vaccinations? YES / NO

Young Persons' Drop-In Clinic Every Friday 4-5pm

After working closely with a teenage member of our Patient Participation Group to better address the health needs of young people living in Totnes and the surrounding areas we are pleased to offer a walk-in, no-appointment-necessary clinic service for anyone of school age (including sixth form/college).

The clinic runs from **4-5pm every Friday** and you will normally have a choice of seeing one of two members of the usual surgery team:

Dr James Cooper

Julie Frost (practice nurse and nurse prescriber)

Please feel free to attend with any problem you might wish to discuss. We understand that not everyone will feel comfortable seeing a male doctor so Julie Frost is happy to talk through any matters relating, for example, to contraception and can also prescribe or administer necessary medications and treatments.

Friday afternoons are generally the quietest time at the surgery so there will be very few people in the waiting room. You will hopefully find this a more relaxed environment in which to come and see us.

Please also be assured that this service is IN ADDITION to all the other ways you can access the surgery throughout the week.
